TcLand Expression strengthen its management team by recruiting Elodie Kazek as VP Marketing and Commercial Operations

Nantes, France, June 3, 2010 – [TcLand Expression SA](#), a global leader in the field of gene expression biomarkers in allo- and auto-immunity, today announced the appointment of Elodie Kazek as its Vice President Marketing and Commercial Operations.

TcLand Expression is now clinically validating gene expression biomarkers for solid organ transplantation and is also developing gene-expression-based companion diagnostics for immune-mediated disorders.

“We are particularly delighted to welcome Elodie Kazek to TcLand Expression as VP Marketing and Commercial Operations. Elodie has acquired extensive experience in international businesses in France and the USA. Her arrival will significantly strengthen our sales and marketing division”, said TcLand Expression CEO Alain Huriez, MD.

“I’m very glad to join the TcLand team. TcLand is uniquely positioned in the European Personalized Medicine landscape. Their disease management strategy along with a strong expertise in immunology biomarkers development are stakes for driving the force in the immunology companion diagnostic market”, said Elodie Kazek.

Elodie Kazek spent 7 years within the group bioMérieux - first in Marcy l'Etoile in France and then in the United States, where she successively held the posts of Marketing Manager (2003-2004), Global Marketing Director Molecular Biology (2004-2006) and Theranostics Business Unit Director/Boston (2007-2009). Prior to joining bioMérieux, Elodie Kazek spent three years at Merck (2000-2003), where she was a Business Manager in the company's generics business. Ms Kazek began her sales & marketing career with a 4-year stint at Fresenius Kabi pharmaceuticals, with national-level responsibilities in France and then in the Western Europe division.

Elodie Kazek is graduated in pharmacy from the Claude Bernard University (Lyon, France) and holds a degree from the ESSEC business school (Paris, France).

TcLand Expression

TcLand Expression is an acknowledged pioneer in the discovery, the development and the validation of gene expression biomarkers for unmet medical needs in transplantation and auto-immune disease. The company benefits from an exceptional scientific and clinical environment.
