

Press release

TcLand Expression appoints personalized medicine pioneer Patrick Terry as Chairman of the Board of Directors

Nantes, France, June 17, 2010 – [TcLand Expression SA](#), a global leader in the field of gene expression biomarkers in allo- and auto-immunity, today announced the appointment of Patrick Terry as Chairman of the company's Board of Directors. Patrick Terry (a Board member since 2009) succeeds TcLand Expression CEO Alain Huriez MD, who had held the position since 2005.

TcLand Expression is developing gene expression biomarkers in transplantation medicine (currently undergoing clinical validation) and companion diagnostics based on gene expression in auto-immune diseases.

"We are proud that Patrick Terry has agreed to chair TcLand Expression's Board. Patrick is a pioneer in personalized medicine, a co-founder of the world-leading company Genomic Health Inc. and a founder of the Personalized Medicine Coalition. His expertise in this sector has already significantly benefitted TcLand Expression and will be fundamental for achieving our next development milestones", emphasized Alain Huriez. *"We will be preparing to launch our first product and are seeking to raise our profile in the North American market. Patrick's in-depth knowledge will constitute a valuable asset for our commercial strategy over the coming years",* he concluded.

"I am delighted to have been appointed as Chairman of the Board. Over the last 5 years, under Alain's presidency, the company has reached milestones - notably in terms of value creation", stated Patrick Terry. *"As the incoming Chairman, my objective is to expand upon the good work done to date. TcLand Expression is well positioned to have a major, significant and quantifiable impact on patients' needs in the field of personalized medicine",* he concluded.

Patrick Terry is a co-founder and former Director of Genomic Health Inc. (NASDAQ:GHDX) a pioneering personalized medicine company based in California that he and a group of prominent leaders in the fields of genomics, bioinformatics and biotechnology founded in 2000. Patrick Terry is also a founder of the Personalized Medicine Coalition, the Coalition for 21st Century Medicine and co-founder and a former President of the International Genetic Alliance, which focuses on empowering problem-solving by networking the consumer movement, centers of excellence and high technology with patient communities around the world. Patrick Terry has published dozens of peer-reviewed scientific papers, articles, and book chapters in the fields of genetics, personalized medicine, and biomedical research. Some of his activities include leadership positions on numerous trade associations, professional societies and corporate boards and he sits on a number of US federal advisory bodies.

He has received many honors and awards in the business and scientific communities in the USA and internationally. Patrick Terry has dedicated his career to helping people and advancing a patient-centered perspective in research, product development, and translational medicine.

TcLand Expression

TcLand Expression is an acknowledged pioneer in the discovery, the development and the validation of gene expression biomarkers for unmet medical needs in transplantation and auto-immune disease. The company benefits from an exceptional scientific and clinical environment.
